

WATERPROOF FOLDING THERMOCOUPLE THERMOMETER

The CDN Waterproof Folding Thermocouple Thermometer (TCTW572) provides accurate temperature readings with a fast 2-3-second response. The built-in gyro sensor rotates the backlit display in four directions, making the TCTW572 easy-to-read in any position.

This durable thermometer can withstand water immersion. The Waterproof Folding Thermocouple Thermometer is rated at IPX7, which means it is protected against water immersion for 30 minutes at one meter. This is more than enough protection against dropping the thermometer into a full sink or even a pot of soup.

The TCTW572 is NSF® Certified, with a 4.33-inch 304 stainless-steel stem that automatically turns the thermometer on and off. The 1.5 mm thin tip allows for easy insertion into thin cuts of delicate fish or meats as well as general purpose cooking.
