

## Precision Defrost Timer with NEMA III Enclosure

A longer, more accurate defrost timer performance is greatly enhanced in a clean environment. Our rain-tight enclosure is well sealed to keep dirt and dust out of the timer gear train and all moving parts. Another advantage to this approach is the engineered plastic will not corrode and it is non-electrically conductive.

### 6040 Series Defrost Control Time Initiated - Time Terminated

PMC MODEL	6 PACK	VOLTS	Contact N-3	Contact 1-3	Contact 2-4
