### Tested For Performance and Durability

Committed to meeting the high-performance needs of a wide range of food service environments, Sharp Electronics consistently offers innovative products and an industry-best on-site warranty. The latest line of commercial microwave ovens are not only packed with the most in-demand features, they are subjected to rigorous testing and evaluation methods to ensure dependability and durability in settings that include fast or full-service restaurants, hospitals and nursing homes, school cafeterias, convenience stores, and more. For added convenience, most ovens feature stainless steel interiors and exteriors that resist pitting, chipping, scratching, and corrosion, and are very easy to clean and maintain.

### The Right Product For Every Purpose

#### Innovative Technology, Easily Within Your Reach

After carefully listening to countless restaurant needs and requests, Sharp developed and patented the Twin-Touch™ dual control panel. Even when ovens are positioned high on a counter or stacked, the unique TwinTouch dual control panel operation allows accurate, easy operation by virtually all personnel, regardless of height.

#### Small On Space, Big On Quality

Combining high-quality material and sophisticated design, Sharp's medium-duty microwave ovens are built to last. Ideal for convenience stores, break rooms, hospitals, and other small and low- to mid-volume settings that do not rely heavily on microwave cooking, these ovens fit easily in smaller kitchens that need a durable, efficient product for heating up foods.

#### Expand The Menu, Not The Kitchen

In situations where a full-sized oven is not necessary, Sharp high-speed convection ovens produce quality bread products quickly. The ability to easily serve fresh warm bread products or small "finger" foods is a great way to expand menus and satisfy appetites.

QUALITY AND DEPENDABILITY THAT GO ABOVE AND BEYOND

## Heating Appliance When You Need It

Perfect for smaller kitchens that do not require volume cooking, Sharp medium-duty microwave ovens feature a generous **1.0 cubic-foot capacity** and a convenient **1,000-watt power output**. They're ideal for defrosting, heating up or cooking small food items, and bring a new dimension of dependability to break rooms, hospitals, convenience stores, gas stations, and countless other settings. An array of easy-to-use features and one-touch controls add versatility—without added costs of using a high-powered microwave or oven.

Featuring stainless steel interior and exterior doors, these durable units stand up well to day-to-day use and are built to last. Strong, specially designed latch handles reduce door failure, one of the most frequent problems on units of lesser quality.

### R-21LCF

**Dependable 6-Minute Electronic Dial Timer** – is clearly marked in 10, 15 and 30-second increments. When the door is opened during cooking, the remaining time is cancelled. This is a vast improvement over mechanical dial models that continue counting down after food was removed – wasting energy and reducing the magnetron's life.

**Heating Time Guide** – recommends times for heating a variety of popular foods. It's a handy "on-the-spot" reference for timesaving convenience.

### R-21LVF

**Computerized Touch Controls** – provides 10 programmable memories with one-second increment timing; built-in safeguards prevent unauthorized changes.

**Double Quantity Pad** – automatically provides optimum heating times for two portions for excellent results.

**Express Defrost™** – automatically divides total defrosting time into 3 stages with 3 power levels.

**Memory Check** – lets the user confirm the time setting and power level for each memory pad.

### R-21LTF (includes features above)

**Two-Way Programming** – use any of the pre-programmed memories or manually program up to 20 of your own.

**3-Stage Programming** – program food to defrost then begin cooking at one power level and finish cooking at another.

**Counter Check** – lets the oven "remember" how often each feature was used plus the total number of manual uses so managers can keep closer tabs on operation.
