

HOT DOG EQUIPMENT BUYING GUIDE

ROLLER FINISH OPTIONS

StalTek™

- **Star Exclusive** - innovative coating!
- **Most durable coating in the market**, even under vigorous cleaning
- **5 YR ROLLER SURFACE WARRANTY!**
- Unparalleled grip performance also turns uneven product

BEST ROLLER IN THE INDUSTRY

Duratec

- Non-stick coating facilitates cleaning
- Roller grill finish designed to grip and turn products consistently

Chrome

- Less expensive
- Durable - can take a brisk cleaning
- Shiny and attractive when clean

CONTROL OPTIONS ANALOG vs. ELECTRONIC

• ANALOG CONTROLS

Analog controls for front and rear temperature zones are durable and economical, but don't allow for fine temperature adjustments

• ELECTRONIC PROGRAMMABLE CONTROLS

Electronic controls allow the roller grill to react to grill surface temperatures, resulting in consistent temperatures and better quality products

Program individual product cook/hold times and temps, taking the guesswork out of preparing menu items
Contact Factory for custom controls

Best roller in the industry
StalTek™

ROLLER GRILLS feature STADIUM SEATING

Stadium seating slanted roller design provide a 3° to 5° slope for the best presentation of your products increasing sales and impulse purchases

Flat roller grills available! Used for double-sided or employee serving, and can be recessed below the counter. Contact factory for details and pricing.

BUN DRAWERS

BUILT-IN vs. STAND ALONE

• BUILT-IN

Eliminates the need for a separate piece of equipment, but has limited capacity

• STAND ALONE

May be heated or unheated, depending on the bread type and if it is individually wrapped.

Can be stacked beneath a roller grill, which increases height. Can be built-in to cabinets, or drop surfaces
