

Traulsen SmartConnect™ Refrigeration at Your Fingertips!

Time management is a key challenge in today's commercial kitchens, and staying on top of the details can mean the difference between success and failure. Traulsen, an industry leader for 85 years, knows how much you need control in the kitchen- even when you can't be there.

Traulsen's new SmartConnect™ app, with WiFi connectivity for your upright models, will monitor the operating temperatures of 50+ units in various locations. The app will provide real-time tracking on everything from system performance to the frequency of door openings- all at your fingertips. E-mail notifications with downloadable log files provide crucial alerts like power failure or temperature stratification.

- ✓ OPTIMIZE COMMERCIAL KITCHEN OPERATIONS & PROCEDURES
- ✓ ANALYZE TEMPERATURE & DEFROST SETTINGS
- ✓ MAINTAIN FOOD SAFETY THROUGH REMOTE ACCESS

SmartConnect™ Features

- Display unit's cabinet temperature & online status
- Change temperature setpoint, start defrost intervals view past & next defrost, and simple door(s) open status
- Shows internal air & evaporator temperature logs and sends reports via e-mail
- Event history & error codes for alarms such as: high cabinet temperature, door(s) open and power failures.

Download the application via the App Store or Google Play.
